# This is what to do with your other waste

We can collect bulky waste items, electrical waste, hazardous waste and landfill waste from your property up to 4 times a year. Please order collection at least one week before the scheduled collection date, online via [www.ograb.se](http://www.ograb.se) or by phoning Customer Service on 044-709 59 90.

## Bulky waste

Domestic waste that is too bulky to fit into the bins. This covers only the kind of large domestic items that people take with them when moving house.

No interior fittings (doors, kitchen cabinets, etc.) or car parts.

**Collected** from your home.

**Order collection** at least one week before the scheduled collection date. Maximum 10 items per collection. Bulky waste must not be packed in sacks.

Arrange with your janitor/facility manager where to leave items for collection. It is important that you inform us of the location of items when you order waste collection.

**Hand in** at a staffed Recycling Centre (ÅVC).

## Electrical waste

TV, radio, computer, household appliances, refrigerator, freezer, lightbulbs, etc.

**Collected** from your home.

**Order collection** online or by phone (as described above).

Arrange with your janitor/facility manager where to leave items for collection. It is important that you inform us of the location of items when you order waste collection. Small electrical items such as shavers, hair dryers, mobile phones, fluorescent tubes, lightbulbs and small batteries may be placed in the relevant container.

**Hand in** at a staffed Recycling Centre (ÅVC).

## Hazardous waste

Oil, paint, solvents, etc.

**Hand in** at a staffed Recycling Centre (ÅVC). The contents of bottles and jars, etc. must be clearly labelled. If you are uncertain about anything, contact Recycling Centre staff.

## Textiles

Clothing, face-cloths, towels, bedding, nylon stockings, etc.

**Deposit** in containers located in urban areas, **or hand in** at a staffed Recycling Centre (ÅVC). Thanks to technical advances it is now possible to recover fibres from worn textiles. Clothes, shoes and accessories that can be re-used are sent to people in need in other countries, or sold to generate income for aid organisations.

By depositing your old textile products in the green containers, you are also doing the environment a good turn.

Recycling textiles also saves us the cost of incinerating them.

Go to [www.ograb.se](http://www.ograb.se) to find out where our Textile containers are located.

## Medicines

Medicines and hypodermic needles.

**Hand in at a chemist's.**

Medicines: place medicines in a transparent plastic bag or one of the special medicine waste bags available from the chemist's. Chemists do not accept discarded medical thermometers or used batteries.

Hypodermic needles: return these in the special container available free of charge from the chemist's. It is prohibited to dispose of hypodermic needles as combustible waste. However, once the needle has been removed, the syringe itself may be placed in combustible waste. The container for hypodermic needles is returned to the chemist's when full.
